

smart analytics – BMWK supports international cooperation network for three more years

## **Many other promising projects in the pipeline**

**(Stuttgart) – The Central Innovation Programme for SMEs (ZIM) run by the German Federal Ministry for Economic Affairs and Climate Action (BMWK) is funding an international cooperation network – smart analytics – for a further three years. This competence network consists of small and medium-sized enterprises (SMEs), universities, hospitals and scientific institutes from Germany and other countries that are working together to develop innovative analytical methods and applications for healthcare, industry and research. Initial research and development projects are already underway.**

Originally limited to one and a half years, smart analytics started in May 2020. Under the direction of BioRegio STERN Management GmbH and the international coordinator ISOCS (International Society for Olfaction and Chemical Sensing), an active ZIM cooperation network with 15 companies, 11 German research partners and five partners from France and Austria has now been created. It offers everyone involved ideal conditions to obtain BMWK funding for innovative research and development projects. During Phase I, which covered a three-year period, projects from the STERN BioRegion benefiting from total funding of nearly two million euros have been initiated within the framework of the smart analytics network. One recent example is NanoR – a newly funded project by 4base lab AG from Reutlingen – which has set out to develop new approaches for the testing and quality control of mRNA-based vaccines, with the aim of reducing the error rates for synthesised mRNA and ensuring their quality.

In Phase II, which has now been approved, there are many further promising projects in the pipeline. Dr. Verena Grimm, Project Manager at BioRegio STERN Management GmbH, is therefore delighted about getting the go-ahead: “Our smart analytics network is a platform for highly innovative companies from very different areas of analytics. Combining intelligent technologies and analytical methods has the potential to create new prospects for wide-ranging areas of application.”

BioRegio STERN Management GmbH is coordinating the international smart analytics ZIM network in Germany. The project is being funded by the BMWK and currently includes 31 partners from Europe. Other companies are welcome to become project partners. This will give them access to targeted support so that they can submit equally promising research and development applications to ZIM as necessary.

**German SMEs:**

- AHF analysentechnik AG, Tübingen
- 4base lab AG, Reutlingen
- Synovo GmbH, Tübingen
- JLM Innovation GmbH, Tübingen
- KWO Kunststoffteile GmbH, Offenau
- CLADE GmbH, Esslingen am Neckar
- yuri GmbH, Meckenbeuren
- Multi Channel Systems MCS GmbH, Reutlingen
- Mediagnost GmbH, Reutlingen
- Contexo GmbH, Winterbach
- DTS Prototyping, Bisingen
- FREESIXTYFIVE GmbH, Bad Kreuznach
- defortec GmbH, Dettenhausen
- macs Software GmbH, Zimmern ob Rottweil
- Goldfuss engineering GmbH, Balingen

**German research partners:**

- NMI Natural and Medical Sciences Institute at the University of Tübingen, Reutlingen
- University Hospital Tübingen
- Hahn-Schickard-Gesellschaft für angewandte Forschung e.V., Villingen-Schwenningen
- University Hospital Würzburg
- Furtwangen University
- Institut für Energie und Umwelttechnik e.V. (IUTA), Duisburg
- Fraunhofer Institute for Silicate Research ISC, Würzburg
- Reutlingen University
- University of Applied Sciences Würzburg-Schweinfurt (FHWS)

**International partners:**

- IONICON Analytik GmbH, Austria
- Qualizyme Diagnostics GmbH & Co KG, Austria
- ADBINNO SARL, France
- Cordouan Technologies SAS, France
- Poly-Dtech, France

**Coordinators:**

- ISOCS, France
- BioRegio STERN Management GmbH, Germany
